Nerviano Medical Sciences S.r.l. Expands US Presence

NERVIANO, 1 August, 2022 – Nerviano Medical Sciences S.r.l. (NMS Srl), a member of NMS Group and a clinical stage company discovering and developing innovative therapies for the treatment of cancer, announced today that it has expanded its presence in the US with the creation of a new US subsidiary, Nerviano Medical Sciences Inc.

Nerviano Medical Sciences Inc. is incorporated in Delaware State while the company's activities will be mostly concentrated in the Boston, Massachusetts area. The US subsidiary is part of NMS Srl and its holding NMS Group's aggressive transformation plan to fortify further the Group's footprint and accelerate its pace in expanding in the world's key biotech and pharmaceutical market.

"NMS Srl has developed a unique and proprietary platform of First-in-Class and Best-in-Class assets where we are currently working either with multiple partners or by autonomously to advance our assets aggressively to registration. Since an important part of our revenue already comes from our US partners, having our physical presence in the US demonstrates yet again our commitment to strengthen our relationship with pharma, biotech and academics centers and to potentially expand further our pipeline" said Hugues Dolgos, PharmD chief executive officer of NMS Group and NMS Srl. "I'm delighted to open our first office in Boston as a proud resident in this biotech core of the country," said Lisa Mahnke, M.D., PhD, Chief Medical Officer of NMS Srl and Managing director of Nerviano Medical Sciences Inc. "We will start recruiting immediately key US-based roles to support the group, managing key R&D and commercial activities directly from our office. We expect to increase heavily our clinical programs through local partners to accelerate our speed with our oncology forward approach and deliver treatments to patients where there is an unmet need," Lisa concluded.

About Nerviano Medical Sciences

[Nerviano Medical Sciences](#) S.r.l. (NMS Srl) is focused on discovery and clinical development of small molecule NCEs for oncology. We take innovative approaches on novel mechanisms of action and drug targets to bring first- and best-in-class personalized medicines to cancer patients. Our current pipeline consists of NCEs, which all originate from our well validated kinase platform that span from early preclinical to clinical stage projects and which are being developed both in house and with partners.

NMS Srl combines the flexibility of a biotech with the quality of a big pharma. Here, an experienced management team leads a highly skilled staff of professionals with global vision and a broad range of expertise in research, drug discovery and clinical development. We cover the whole range of additional aspects of drug development through the NMS Group affiliate companies, Accelera (AdMet) and NerPharMa (manufacturing). A key strength is our industrially renowned kinase inhibitor drug discovery platform which comprises an ever-evolving chemical collection with broad intellectual property coverage, discovery know-how and technologies which enabled us to out-license IP rights on recently approved innovative medicines such as encorafenib and entrectinib.

We collaborate with academia and clinical investigators as well as with industrial partners worldwide to advance our programs from early discovery to clinical development of new drugs. We seek further strategic collaborations to develop and commercialize our products in different territories as well as in-licensing opportunities of promising assets for clinical development.

About NMS Group

[NMS Group](#) is the largest oncological R&D company in Italy. With more than 400 employees, More than half of whom are highly educated individuals dedicated to innovative research, development and manufacturing. The NMS kinase inhibitor discovery platform as well as the antibody-conjugating payload platform are the driving forces of the group's innovation, securing global recognition of NMS in personalized therapy. Recently entrectinib, originally discovered by NMS, is a targeted kinase inhibitor to treat NTRK1/2/3 and ROS1 dependent solid tumors

that was licensed to Ignyta, now a member of the Roche Group, gained approvals for commercialization in all major markets. This is further evident of the competitiveness of the drug discovery platform of NMS Group.

NMS Group has three subsidiaries. NMS S.r.l. is a FIC / BIC focused drug research and development company with a robust pipeline of more than a dozen anti-cancer projects, and three of the projects are currently in early clinical development. The other two subsidiaries are Accelera, which is a preclinical CRO company, and NerPharMa which manufactures API and drug products supporting clinical developments and commercialization.
